# Why choose a collaborative robot ?

Designed for collaboration with humans in a shared space

Versatile for carrying out multiple tasks in a laboratory

Suppression of musculoskeletal disorders (MSDs) HSE issue

Automation of repetitive tasks with low added value

Intuitive programming, a simplified approach to self-learning by gesture

## INDUSTRY 4.0 IN SUPPORT OF OPERATIONAL EXCELLENCE IN R&D CENTRES AND LABORATORY

Ekium supports you in your collaborative robot project

Advice and support services in the analysis of your needs

Preliminary study & realisation proof of concept (POC)

Realization of the project

Evolutions and maintenance

### Recovery plan 2021 - 2022

Industrial SMEs and ETIs

Up to 40% support for modernisation investments.

### Research Tax Credit

Ekium obtains approval from the Research Tax Credit, which recognises our company's ability to carry out R&D work. Our clients can deduct up to 30% of the sums paid for research projects from their corporation tax.
